

VP-10

Internal Financial and Risk Report

CFO report to the Board | 10 September 2025 | Unaudited

Entity	VertexPay Technologies Private Limited
Status	Participant Case File
Benchmark note	Synthetic record. Names and identifiers are fictional; statutory and regulatory sources are real.

Prepared by Leena Iyer, CFO. Figures are unaudited and in INR million unless stated. This report was listed as an attachment to the 12 September Board notice, but Aarav says he received only pages 1-3.

Executive assessment

- Unrestricted cash at 9 September: INR 13.4 million; payroll and statutory outflow due by 30 September: INR 18.9 million.
- Base-case 13-week funding gap: INR 72.6 million; downside gap: INR 91.8 million.
- Nimbus represented 38% of FY2025-26 contracted revenue and 54% of accounts receivable.
- INR 31.5 million Nimbus milestone revenue was recognised in August although customer acceptance was not signed; cash forecast assumed full receipt by 12 September.
- Payments to Vertex Labs LLP totalled INR 24.1 million from April-August, versus INR 4.0 million annual cap described in Series A disclosure schedule.

Management profit and loss

INR m	Apr-Jul actual	Aug actual	Sep forecast	FY budget YTD
Revenue	82.4	45.8	21.2	118.0
Less: Nimbus unaccepted milestone	-	(31.5)	-	-
Adjusted revenue	82.4	14.3	21.2	118.0
Employee cost	47.2	12.4	13.1	56.0
Cloud and infrastructure	22.6	8.1	7.8	24.5
Vertex Labs LLP	14.5	9.6	0.0	3.0
Other operating costs	19.8	5.2	4.9	18.0
Adjusted EBITDA	(21.7)	(21.0)	(4.6)	16.5

Arithmetic note: the listed Apr-Jul costs total INR 104.1 million against revenue INR 82.4 million, yielding adjusted EBITDA of negative INR 21.7 million. For August, listed costs total INR 35.3 million against adjusted revenue INR 14.3 million, yielding negative INR 21.0 million. The Board slide elsewhere shows August EBITDA negative INR 19.4 million because it excludes INR 1.6 million of legal and forensic accruals.

Cash and working capital

Date	Cash	Committed outflows	Expected inflows	Net headroom
9 Sep	13.4	(18.9)	0.0	(5.5)
30 Sep base	0.0	(42.6)	19.2	(23.4)
31 Oct base	0.0	(35.7)	8.5	(27.2)
30 Nov base	0.0	(33.1)	11.1	(22.0)

The rows are period-end snapshots, not additive; nevertheless, page 2 calls their net headroom sum INR 78.1 million. The actual sum is INR 78.1 million in absolute deficits, but the 13-week funding request was set at INR 90 million to include a buffer. The bridge term sheet shown to shareholders did not reconcile this buffer.

Revenue-recognition and customer risks

Finance booked the INR 31.5 million Nimbus milestone on Aarav's 30 August instruction relying on an unsigned acceptance email draft. Nisha objected on 1 September. Aarav says the MSA deemed acceptance after five days without rejection; the full MSA is absent. Reversal would reduce reported August revenue and may affect investor information rights, but it does not itself establish fraud.

Related-party payment review

Bank records show six transfers to Vertex Labs LLP. Four have purchase orders. Two, totalling INR 6.4 million, are supported only by pro forma invoices. Vendor quotes supplied by Vertex Labs total INR 19.8 million, leaving INR 4.3 million unexplained at report date. On 18 September, Vertex Labs refunded INR 3.2 million marked 'unused hardware reserve'. No evidence traces funds to Aarav personally.

Regulatory and operational classification

VertexPay's architecture document says customer funds settle directly through Nimbus accounts. If correct, VertexPay is a technology service provider/payment gateway rather than a non-bank payment aggregator for the pilot. Marketing statements and one demo flow suggested VertexPay could hold merchant reserves; no live reserve account was identified. External regulatory advice was recommended but is missing from the record.

CFO qualifications

The report is not an audit, valuation or fraud conclusion. Figures were compiled from management systems under changing access controls. The CFO signed the report at 18:22 on 10 September. File properties in the evidence pack show last modification at 07:55 on 12 September by 'KMenon', without an identified change log.
